- It's made with HTML, CSS, JavaScript, and PHP. You can track your progress, join a friendly forum, and enjoy a nice design.
- There's a special section for meditation where you can listen to relaxing music. And there's a community area where you can ask questions and read answers from other users.

Technologies: Html, Css Javascript, php and PhpMyadmin

Project URL: <http://yogabliss.free.nf/>

WORK EXPERIENCE

Developer Internship

SDAC Infotech

2023-2023

- During my internship at SDAC Infotech as a frontend developer, I worked on a project for Excedy Company, a product-based system utilizing the MVC (Model-View-Controller) architecture.
- My primary responsibility was the "View" part of the MVC framework, which focused on designing and developing the user interface.
- I created visually appealing and user-friendly web pages using HTML, CSS, and JavaScript, ensuring that the users had an excellent experience while interacting with the product.
- This involved closely working with the design team to implement the UI designs and collaborating with backend developers to integrate the front end with the server-side logic.
- Through this experience, I gained valuable insights into frontend development and improved my skills in building responsive and interactive web interfaces.
- Overall, this internship significantly enhanced my understanding of professional web development processes and teamwork.
